Resource Link	Resource Description
Collegial Learning Whole Class Instruction	Teachers work to develop instructional plans. When time allows they return with those plans to the team, and compile and synchronize the work to establish the official record for that grade level and subject. Includes a template for recording a Whole Class instructional plan.
Effective Questioning	Document explaining good principles for effective questioning.
Learning Plan Grid	The unit plan aligns the curriculum to standards and benchmarks. The next step is to align the curriculum to instruction. This is where the real fun begins—teachers sharing their most successful instructional strategies for meeting each objective in the unit of instruction. Learning plan grids level each objective into three tiers—target, enhanced, and prerequisite. The learning plan grid also differentiates learning activities among various modes of instruction. Includes a template for a Learning Plan.
Whole Class Weekly Schedule	This document and template assists in planning whole-class instruction for a week in one subject.
