Leadership and Innovation
The Center on Innovations in Learning is one of seven national content centers funded by the United States Department of Education. The Center on Innovations in Learning’s mission is to (a) increase the capacity of state education agencies (SEAs) to stimulate, select, implement, and scale up learning innovations in local education agencies (LEAs) and schools to improve learning outcomes for all students; and (b) increase the capacity of regional comprehensive centers (RCCs) to provide technical assistance to SEAs relative to the Center’s scope of responsibility.
The Center on Innovations in Learning has two areas of concentration:

• **Science of Innovation**: examining change leadership and change processes (improvement, innovation, and transformation)

• **Personalized Learning**: including learning technologies, competency-based education, and personal competencies

Please contact us for more information on these topic areas or visit our website:

Organization
SEATTLE — On Monday mornings, fresh recruits line up for an orientation intended to catapult them into Amazon’s singular way of working.

They are told to forget the “poor habits” they learned at previous jobs, one employee recalled. When they “hit the wall” from the unrelenting pace, there is only one solution: “Climb the wall,” others reported. To be the best Amazonians they can be, they should be guided by the leadership principles, 14 rules inscribed on handy laminated cards. When quizzed days later, those with perfect scores earn a virtual award proclaiming, “I’m Peculiar” — the company’s proud phrase for overturning workplace conventions.

A Brief History Of The Hashtag

Stowe Boyd

Conversation with Chris Messina in Aug 2007

- Chris was thinking about my distinction between Groups and Groupings
- Proposed Twitter ‘Channels’ to direct tweets to sets of people (the opposite of lists)
- I said they would be used as tags, not as channels
- We were both right
